

P. Elena Maddox

CSCE 242

Website name: CasadeFranco.com

I would like to design a website for a Portuguese restaurant in North America. Ideally, it would be an upscale sit-down restaurant featuring dishes significant to Portuguese culture. It will potentially also offer Fado shows on occasion, with a page potentially dedicated to explaining what Fado shows are. It will also have a shop that provides some Portuguese grocery items and gifts that are hard to find in the states. Ideally, it should mimic the design and structure of high-end restaurant web pages, with a cohesive menu structure and mockups of a nice restaurant.
